How Does Your Garden Grow

你的花園如何生長呢

How Do Plants Grow

Have you ever wondered how a tiny seed grows into a plant? Grade 1 students explored the parts of a plant and learned about the different stages of a plant's life cycle. They discovered that plants need sunlight, water, soil, and air to grow strong and healthy. Students then put their learning into action by planting their own seeds in soil and creating real classroom gardens. They watched their plants grow and observed the changes along the way!

Protecting Our Gardens

Growing a garden was only part of the challenge! Plants also need protection from animals, strong winds, birds, and too much sunlight. Students explored different ways to protect a garden, including fences, walls, netting, and pergolas. They then looked at the available materials and designed protection for their own gardens. Some students combined several methods, while others chose the ones they thought would work best. Finally, they brought their plans to life by building their designs around their gardens, using creativity and problem-solving to help keep their growing plants safe.

植物如何生長

你是否曾經好奇，一顆小小的種子是如何長成一株植物的呢？一年級學生探索植物的各個部分，並認識植物生命週期的不同階段。他們發現植物需要陽光、水、土壤和空氣，才能茁壯健康地生長。接著，學生將所學付諸實踐，親手把種子種進土壤中，在教室裡打造屬於自己的小花園。他們細心觀察植物一天天成長，也記錄並發現植物在生長過程中的各種變化！

守護我們的花園

種植花園只是挑戰的其中一部分！植物也需要受到保護，避免受到動物、強風、鳥類以及過多陽光的影響。學生探索各種保護花園的方法，包括圍籬、圍牆、網子和棚架等。他們接著觀察可使用的材料，為自己的花園設計合適的保護措施。有些學生結合多種方法，有些則選擇自己認為最有效的方式。最後，學生將設計化為實際行動，在花園周圍動手建造自己的作品。他們運用創意與解決問題的能力，為正在成長的植物打造一個安全的家園。
